Natural, sustainable and eco-friendly promotional gifts

The GO GREEN collection helps you achieve your promotional goals in a more sustainable way. The products in this catalogue provide greener alternatives to traditional items. They are fully or partially made of natural, sustainable or recycled materials or provide a substitute to a normally disposable everyday item.

Materials

One way to reduce waste – especially plastic waste – is to choose products that are made of materials that are or can be recycled. Recycling has several benefits, in addition to reducing the amount of waste going to landfills. It uses waste materials to convert them into new products, which reduces the use of fresh raw materials. Recycling materials needs the fraction of the energy than the original production, which also reduces air and water pollution.

Another option is to use natural materials that are biodegradable i.e. they are capable of decomposing back into natural elements. It means that these products can be safely disposed of when they are no longer functional.

Reusable products

We encourage our customers to replace everyday disposable items with reusable alternatives and enjoy their advantages. Not only do they help to reduce the amount of waste, but they are safer as well. Storing your drinks in glass containers can help to preserve them longer. Cotton shopping bags are washable, so you do not have to worry when you buy your vegetables and fruits in bulk. These products also look much more attractive and elegant, ensuring that your message makes the best impact.

BE CREATIVE is a special product collection that lets you create perfectly customized and truly unique promotional gifts. These items give you the freedom to present your brand with bold, full-colour designs that can be easily integrated into your corporate image. Some of the BE CREATIVE items even give you the opportunity to mix and match the colour and material of the product parts or design your custom shape to make them more outstanding.

UNIQUE

The BE CREATIVE Collection lets you create unique and memorable messages and images by offering a high degree of customisation.

INNOVATIVE

The BE CREATIVE Collection consists of special products, developed and hand-picked with creativity and special customisation in mind. Imprints are almost entirely made with digital technologies, ensuring colourful and high-resolution prints.

ACCESSIBLE

BE CREATIVE products are custom-made in our in-house production facilities or assembled from our stock of parts. They are manufactured, assembled or printed in Europe. This ensures short delivery time and low minimum order quantity, even for entirely custom-made products.

Made in EU

Made in EU products are manufactured in-house, in our own production facilities. We design and create these promotional gifts with special care, choosing the most optimal materials with customisability in mind. This way, you can reach your promotional goals with budgets of any size, while still getting unique and quality products. We strive to create items that instantly grab the attention, while also being practical and useful.

Assembled in EU

Some of our items are assembled from an extensive stock of many different parts stored in our warehouse. Many of these products give you the opportunity to mix and match different colours, sizes, and materials to really make them your own. Some of them even have customisable shapes that compliment your design. After the printing, we assemble these parts ourselves in Europe and prepare for shipment within a few days.

GO
GREEN

Wood

Nothing expresses premium quality more than wooden promotional gifts branded with a company logo. This evergreen material has an elegant appearance that is associated with high value. Our wooden products are sourced from a variety of wood species such as walnut, pine and birch. Since timber production does not create any waste, these items are perfect for sending an eco-friendly message. Moreover, the manufacture of wooden products consumes less energy than most materials, and creates items that can stand the test of time.

Godello AP804906

GO
GREEN

Recycled PAPER

Paper recycling is not only one of the best ways to promote the ecologically friendly attitude of a company, but also one of the most impactful green processes. It aims to counteract the fact that trees are not replanted or cannot grow fast enough to provide enough material for general paper usage. Paper recycling reduces harmful gas emissions, reduces water consumption and energy consumption, greatly extends fibre supply and reduces landfill space.

GREEN

The background of the page is a light beige color with a subtle, repeating pattern of irregular, rounded shapes that resemble cork cells. At the top and bottom of the page, there are horizontal bands of a more detailed, natural cork bark texture in various shades of brown and tan.

Cork

Cork is extracted from the bark of the cork oak tree. It is a completely renewable resource because after the peeling of the bark, the tree immediately begins to grow a new one. As a natural resource, it is 100% biodegradable and recyclable. Cork is lightweight, impermeable to liquids and gases, elastic and compressible, and provides thermal and acoustic insulation. Because of the many beneficial qualities, it is used in a wide variety of products.

Glass bottles

WITH CORK

Tromury AP722800

Natural cork covered borosilicate glass tumbler with bamboo lid and drinking straw, 520 ml. In kraft paper box. **Size:** ø70×230 mm **Printing:** TB(8), DTB(FC), RS3(1), RUV(FC), C2(8), P3(1)

The image features a light green background with a white line-art illustration of bamboo stalks and leaves on the left side. The top and bottom edges of the page are decorated with a close-up, textured pattern of bamboo stalks. The word "Bamboo" is written in a large, white, serif font, with the final letters "oo" being cut off by the right edge of the frame.

Bamboo

Bamboo is one of the fastest-growing evergreen plants, capable of complete regrowth within one year. Besides being nature's most renewable and most sustainable grass, its strength and unique look make it a perfect material for tasteful and long-lasting promotional gifts. The lightweight property and natural elegance of bamboo products never goes out of style, and the durability of these printed accessories guarantees long-term exposure for brands.

Fibre – REINFORCED PLAST

Fibre-reinforced plastics are composite materials that are made by combining plastics like PP or ABS with natural fibres like bamboo fibre or wheat straw. These combinations provide more flexible and more durable materials, resulting in products that can serve you for a longer time. Bamboo fibre has great moisture absorption and ventilation capabilities, while wheat straw plastic fibres are very strong and heat-resistant, eliminating the need to use additional toxins and oils to strengthen the products created from it.

PLA

PLA is a thermoplastic polyester made from renewable resources like corn starch or sugar cane. Its production uses significantly less energy than conventional plastic production and emits fewer harmful gases as well. PLA is commonly used for 3D printing, since it requires a relatively low temperature to shape compared to other materials. The filaments of PLA can easily be coloured, resulting in products such as colourful pens.

GO
GREEN

PLA products are biodegradable, meaning that they can be broken down by microorganisms. These items can be safely disposed of, without worrying about the ecological impact.

Recycled PET

PET is the most often recycled plastic in the world, commonly reused for a countless number of promotional products. PET plastic is 100% recyclable, and can be used again and again without any decrease in its characteristics or quality. Promoting with RPET products is one of the simplest and easiest ways of creating an environmentally friendly corporate image. This chapter offers more RPET accessories than ever before, presenting a range of options that rivals traditional collections.

Recycled PLASTICS

On the road to protecting the environment, moving different kinds of plastics into a circular economy is a huge and immensely beneficial step. Recycling PP plastic and ABS plastic, and using products made from these popular materials is part of that process. PP plastic has high resistance to heat and impact, while ABS plastic is very sturdy and can be easily recycled. Aside from their beneficial qualities, the use of recycled plastic products can build brand reputation and loyalty as well.

Recycled METALS

Certain kinds of metals can be recycled, aiding in the preservation of resources and managing energy consumption. One of the most valued ones is aluminium, since it can be recycled infinitely without any loss in quality. Other products you can find in this chapter are made of recycled stainless steel, which grants extremely long lifespan and durability to vacuum flasks, lunch boxes, mugs, tools, and many other promotional gifts.

Cotton

Cotton is the most regularly used natural fibre, the perfect material for soft, comfortable, and breathable fabrics. In this chapter, you will find products made of organic or recycled cotton. The organic variant has been grown from genetically non-modified plants, without the use of synthetic pesticides and fertilizers, through a process that preserves biodiversity. Meanwhile, the recycling of cotton helps saving water, as well as reducing waste and CO2 emissions.

Plant – BASED FABRICS

Rather than being produced synthetically, the fibres of plant-based fabrics are derived from something that grows. This chapter contains products made of two exotic, naturally occurring fibres: hemp or jute. Hemp is one of the strongest organic fibres available today, and its harvesting process has a very low environmental impact. Jute is highly resistant to abrasion and stains while presenting a very unique, instantly recognisable look. Both materials can make your branded products easily attract anyone's attention.

Jute

Cekon AP781832-00

Laminated jute beach bag with cotton handles and front pocket. **Size:** 445×350×150 mm **Printing:** TB(8), DTB(FC), S1(3)

Farus AP781833-00

Jute beach bag with matching colour front pocket and handles. **Size:** 480×350×150 mm **Printing:** TB(8), DTB(FC), S1(3)

Eco — FRIENDLY

Thinking and acting in an eco-friendly way in our everyday lives can have a handful of positive effects on both our and the environment's health. It may not seem like much, but you can go a long way in the preservation of everyone's well-being by replacing single-use items with reusable alternatives. Our eco-friendly product collection aims to bring naturality and sustainability into your everyday life in a simple yet impactful way.

OTHER recycled MATERIALS

SPECIAL ENGRAVING

Products with dual-layer coating, designed for a unique laser engraved appearance.

BE CREATIVE graphics on the products of this catalogue are only exhibited for the purpose of displaying printing possibilities and are not reference for sale. Accordingly, products are merchandised blank or imprinted with the customer's graphics.

The right is reserved to deliver products that differ, in execution and in colours, from items illustrated in this catalogue. The displayed product printing parameters may differ from actual possibilities.

Products are delivered without decoration and battery, unless otherwise indicated.

Prices displayed in this catalogue are not including VAT.

PRINTING TECHNOLOGIES

Choosing the best gift - from our wide product collection - for your promotional needs is only half of the success equation. The appearance of your logo or message carries equal importance. In order to ensure the realisation of your brand image, we provide various printing technologies, ranging from traditional methods to state of the art digital technologies.

The following guide aims to give you a brief overview of our labelling techniques and to help you pick the best for your selected item.

Lumpy AP6149

P0(4), UVA(FC)

- Max print colours. (FC=full colour)
- Printing price category.
- Printing technology.

P PAD PRINTING

Pad printing is the most popular, traditional ink-based labelling method. This technology uses a silicone pad to transfer ink onto an item with fine details and high accuracy, applicable to a wide range of materials. Pad printing allows labelling curved surfaces.

S SCREEN PRINTING

Screen printing is a traditional ink-based labelling process, for flat or flattenable products, with high durability and colour accuracy. During the screen printing process ink is directly pressed on the product's surface through a gauze, then fixed with heat treatment.

RS ROTARY SCREEN PRINTING

Rotary screen printing is a special kind of screen printing for labelling bottles. The cylindrical screen printing machine rotates the product parallel with the gauze, resulting in continuous prints throughout the surface of the product.

T TRANSFER PRINTING

Transfer printing is based on traditional screen printing, however, instead of being directly screen printed onto an item, the design is printed onto transfer paper, then applied with a heat press. Transfer printing is applicable to a wide range of products and holds several advantages over screen printing.

DT DIGITAL TRANSFER

Digital transfer printing is a modern, full-colour alternative to traditional transfer printing. The design is printed in photo quality onto transfer paper with a special digital printer, then applied to the product with a heat press. Our digital transfer technology carries no limitation in size or shape of imprints.

SU SUBLIMATION PRINTING

Sublimation printing is a full-colour, digital labelling technique with photo quality. Designs are printed with special ink on a transfer paper, then heat-pressed onto the product's surface. Sublimation is only applicable to light coloured polyester and sublimation coated products.

OP INKJET OVERPRINTING

Inkjet overprinting is used to imprint flat surfaces in full-colour with a special high-speed inkjet printer. As inkjet overprinting does not utilise white inks, imprint colours may be affected by the base colour of the product. Inkjet overprinting is applicable to porous materials, such as paper, natural bamboo and wood.

UV UV LED PRINTING

UV LED printing is a full-colour, digital labelling process utilising UV-cured inks. Logos are directly printed on the product's surface in high-resolution, resulting in instant photo quality imprints.

RUV ROTARY UV LED PRINTING

Rotary UV LED printing is a digital, full-colour labelling process to create photo quality imprints directly on the surface of cylindrical and conical items, allowing a large imprint wrapping the item. Rotary UV LED imprints are coated with transparent varnish for an exquisite look and extra durability.

C CERAMIC PRINTING

Ceramic printing is used to label mugs, glasses and certain metal items using special ceramic paints fired at high temperature. The label is applied to the product similarly to transfer printing, then fired in a furnace.

WPC CERAMIC WHITE PRINTING

Ceramic white printing is a special full colour printing technology for white ceramic products, which is based on ceramic printing.

O DEBOSSING

Debossing is an elegant process that changes the surface of the material that has been debossed, through forming a 3D impression. This impression is achieved by pressing a specially-made die onto the product's surface.

E ENGRAVING

Engraving utilises lasers to mark a product's surface. The surface of the product practically burns in the process to develop the logo. Even small logos can be printed very accurately. Engraving is applicable to metal, wooden, glass and certain plastic products.

RE RAINBOW ENGRAVING

Rainbow engraving is a special laser engraving technology, utilising different wavelength laser beams to achieve coloured imprints on metal items, without the use of inks or chemicals.

ER ROTARY ENGRAVING

Rotary engraving utilises lasers to mark the surface of cylindrical products. With the help of a special rotary device the engraved product is rotated during the printing process, allowing a large imprint wrapping the item. Rotary engraving is applicable to metal, wooden, bamboo, glass and certain ceramic products.

DO EPOXY DOMING

Epoxy doming is a unique printing technology, using full-colour printed stickers covered with 2 component resin. As a result, the treated sticker will have a 3-dimensional look. Epoxy domed logos can be produced in custom shapes and are resistant to UV rays.

DG DIGITAL PRINTING

Digital printing is used to imprint paper products and paper inserts in photo quality. Paper inserts can be produced in various sizes and shapes.

VF VISION FILM PRINTING

Vision Film printing is a special printing technique for labelling sunglasses lenses. During the labelling process, a digitally printed and perforated film is applied enabling a high degree of customisation.

VS VINYL STICKER

Vinyl stickers are digitally printed full-colour, self-adhesive stickers applicable to various, otherwise hard to print, products. Vinyl sticker logos can be produced in various sizes and shapes.

BR EMBROIDERY

Embroidery is used to label textile products, resulting in durable and high-quality imprints, by an automatic embroidery machine which applies thread through needle stitches. Pantone matching is not achievable, due to limited thread colours.

FP FREE PRINTING

Price includes printing with indicated technology. Excluding setup charge.
